

Webinar
March 12, 2019, 1:00 2:30 PM ET

Hospital-based incident command systems (e.g., HICS) have been used formally in U.S. hospitals since the late 1970's as a way to manage incidents, coordinate resources and communications, and collaborate with community-based response agencies. Despite their widespread adoption and use, there is very little published information available on lessons learned, best practices, and real-world adaptation of these systems.

REGISTRATION IS CLOSED. CHECK WWW.ASPRTRACIE.GOV FOR THE RECORDING WITHIN 24 HOURS OF THE WEBINAR. THANK YOU!

ASPR's Technical Resources, Assistance Center, and National Network (TRACIE) is pleased to host this second webinar as part of our series of real-world experiences and practical applications as well as lessons learned from small and rural hospitals who have experienced incidents. This webinar will feature speakers from small and rural hospitals who have experienced incidents based incident command systems. They will provide a brief overview of the incident, discuss the incident command system, discuss tools and share lessons learned for small and rural hospitals, and discuss how they have incorporated these lessons into their current systems and plans. (Access the [first webinar](#) in this series which featured large hospital systems and hospital-based incident command.)

The webinar will take place **Tuesday, March 12, 2019 from 1:00-2:30 PM ET.**

PARTICIPANTS

- **John Hick, MD**, Hennepin County Medical Center & ASPR TRACIE (Moderator)
- **Barbara Dodge, BA-E**, University of Nebraska Medical Center
- **Casey Fleckenstein, RN**, Director of Patient Care Services, Emergency Management Coordinator, Monroe County Hospital
- **Steve Ikuta, BS, MEP**, Emergency Management South Area Manager, Intermountain Healthcare
- **Michael O'Keefe**, Chief Executive Officer, Redfield Community Memorial Hospital Avera
