ASPR TRACIE Technical Assistance Request

Requestor: [Redacted]
Requestor Phone: [Redacted]
Requestor Email: [Redacted]
Request Receipt Date (by ASPR TRACIE): 16 September 2016
Response Date: 21 September 2016
Type of TA Request: Standard

Request:

requested technical assistance in researching emergency medical planning guides for individuals, families, and households. He noted he would also like to identify resources with local considerations (e.g., closest hospital or pharmacy). [Redacted] mentioned that he located a number of general planning guides (e.g., ready.gov, and other FEMA resources), but would like specific medical planning guides.

Response:

The ASPR TRACIE Team reviewed several existing and in-progress Topic Collections and pulled pertinent resources. Of particular relevance are the Pharmacy Topic Collection, Dialysis Centers Topic Collection, Access and Functional Needs Topic Collection, and the Homecare Topic Collection. The resources collected are categorized as follows:

- Prescription/ Medication-related Resources (includes resources for individuals needing medications during emergencies)
- Dialysis Patient-related Resources (provides preparedness information for individuals requiring dialysis)
- Various Access and Functional Needs-related Resources (while not all materials in this section are specific to medical planning, these “generalized” resources can help individuals and families prepare for various hazards)

I. Prescription/ Medication-related Resources

Centers for Medicare and Medicaid Services. (2015). Getting Medical Care and Prescription Drugs in a Disaster or Emergency Area.

This fact sheet is intended for Medicare patients and provides information about how to see doctors and other providers, get prescription drugs and extended day supplies, pay Medicare premiums, and receive dialysis or chemotherapy. It also describes how to replace a Medicare card, or lost or damaged durable medical equipment or supplies that Medicare paid for.

This post provides quick tips and recommendations on how individuals can manage preparations for chronic medications when planning for severe weather emergencies.

This online tool can be used by the general public and enables users to print a personalized medication wallet card that documents prescriptions, dosages, and other important medical information. These cards can help people access their medical records or refill prescriptions after a disaster or public health emergency.

This website helps emergency management teams and the general public locate operating pharmacies in areas affected by natural disasters or public health emergencies. The tool provides maps to identify the location of open and closed pharmacies using Google Maps. The website is free to the public when activated at the request of state or federal officials.

The Center for Drug Evaluation and Research (CDER) at the U.S. Food and Drug Administration offers information on the use of drugs that have been potentially affected by fire, flooding or unsafe water, and the use of temperature-sensitive drug products when refrigeration is temporarily unavailable.

Insulin from various manufacturers is often made available to patients in an emergency and may be different from a patient's usual insulin. After a disaster, patients in the affected area may not have access to refrigeration. This website provides information for patients and providers regarding those issues.

**II. Dialysis Patient-related Resources**

DaVita shares emergency preparedness information for patients on dialysis to ensure they can receive necessary treatment or lessen the impact of missing a dialysis session.

The authors of this article review the disaster-specific patient care recommendations that have been put forward by the Kidney Community Emergency Response Coalition. They also provide a detailed overview of the disaster planning process from the perspectives of kidney patients, dialysis facilities, and volunteer nephrology professionals who may participate in disaster relief.

The authors share tips for people with kidney disease to consider in preparation for various types of disasters.

This 10-second (un-narrated) video encourages dialysis patients to ask their provider about receiving treatment before a storm strikes.

III. Various Access and Functional Needs-related Resources

This webpage includes resources for individuals, service providers (including homecare providers), and community members on ensuring the safety of older Americans during emergency situations. Also included are links to resources, checklists, and apps for older adults and those with special needs and links to national guidance documents for higher level planning at the community, organization/system, and state levels.

The following document provides essential preparedness information for seniors and potentially those in home care situations regarding making a plan, getting a kit and being informed during an emergency.

This portal provides links to information, tools, and resources to assist in multi-sector planning for older adults in all-hazard emergencies. In addition to planning tools, this site also includes legal information and training resources.

This fact sheet helps pregnant women and women with infants or young children in planning for an emergency or disaster.

This website provides links to general resources on protecting health during a disaster and disaster-specific resources (e.g., anthrax, radiation, and smallpox).

This article provides a general overview for seniors and caregivers about emergency preparedness. It includes a list of supplies and suggestions for ensuring equipment will be accessible and durable in the event of an emergency.

This guide can help people create a plan for and recognize the signs of influenza and care for themselves or others sick with the virus. It is available in several languages.

This website offers guidance on the general safety and operation of medical devices following hurricanes.

This infographic summarizes key points including the importance of continued breastfeeding, common nursing challenges, and how first responders and other providers can assist and support women to continue breastfeeding.

This website provides links to resources that can help assist older adults and seniors prepare for a myriad of emergencies including large scale disasters.

This website, created by the Office of Women's Health, provides information on emergency planning for pregnant women and new mothers (e.g., hygiene, disaster supply kit materials, and information on how to carry a baby in a sling for safe transport).
