

ASPR TRACIE COVID-Specific Experiences from the Field

COVID-19 and Changes to the Healthcare Delivery Landscape

COVID-19 pushed our healthcare system to respond in new, demanding, and historic ways. These challenges accelerated many changes, ranging from unprecedented scientific collaboration to the lightspeed acceleration of telemedicine utilization. These resources illustrate how healthcare raced to meet these challenges by implementing changes to the healthcare delivery landscape.

[Denver Health Virtual Hospital at Home](#)

Patrick Ryan, MD, MPH, **Rebecca Hanratty**, MD, and **Connie Price**, MD (Denver Health and University of Colorado School of Medicine) discuss the goals, workflows, outcomes, and lessons learned from implementing a novel “Virtual Hospital at Home” model to treat COVID-19 patients.

[COVID-19 and the Changing Healthcare Delivery Landscape](#)

Paul Biddinger, MD, FACEP, Medical Director, Emergency Preparedness, Mass General Brigham; **Mark Jarrett**, MD, MBA, MS, Chief Quality Officer, SVP & Deputy Chief Medical Officer, Northwell Health; and **Meghan Treber**, MS, ICF TRACIE Program Director, HHS ASPR highlight the impact of COVID-19 on healthcare delivery (e.g., supply chain, patients delaying emergency care, the delay of elective procedures, and financial impacts to the healthcare system).
