

Infection Prevention and Control: Incorporating Lessons Learned in Managing Special Pathogens November 7, 2022 ~ 2:00pm ET

After nearly three years responding to the COVID-19 pandemic, hospitals and other healthcare facilities have learned many lessons about the management of special pathogens. The U.S. Department of Health and Human Services, Office of Technical Resources, Center for Disease Control and Prevention, National Center for Training and Education, and the National Center for Infection Prevention (NETEC) invite you to share your perspectives on how our approach to infection prevention for special pathogens has evolved and how we can support healthcare workers and facilities in managing special pathogens.

We have reached capacity for this webinar; registration is now closed. ASPR TRACIE will post the recording on our home page under "In the News" within 24 hours of the webinar. You can also email askasprtracie@hhs.gov to request a link to the webinar slides once they are available.
